In accordance with the Judgment, the NCMA TG, NMMA TG, and SMVMA TG submit annual reports to the Court to document collection of data and analysis of water supply and demand, including: "Land and water uses in the Basin" "Sources of supply to meet those uses" "Groundwater conditions (including water levels and water quality)" The Project meets the following management objectives from the NCMA 2011 Annual Report: 1. Share Groundwater Resources and Manage Pumping 2. Monitor Supply and Demand and Share Information 3. Manage Groundwater Levels and Prevent Seawater Intrusion 4. Protect Groundwater Quality 5. Manage Cooperatively 6. Encourage Water Conservation 7. Evaluate alternative sources of new developed water (Stipulation Section IV) The Project meets the following monitoring objectives from the NMMA 2011 Annual Report: "The objectives of the Monitoring Program are to establish appropriate data collection criteria and analytical techniques to be used within the NMMA so that groundwater conditions, changes in groundwater supplies, threats to groundwater supplies, water use, and sources of water can be documented and reported on an annual basis?"
